Let's get started!

Read on to learn how your participation can help.

The G1D research initiative
conducted in conjunction with

WHAT?

What is the G1D Registry?

The Glucose Transporter Type I Deficiency Syndrome Registry was created by Dr. Juan Pascual and UT Southwestern with the support of the Glut1 Deficiency Foundation. The online questionnaire asks you questions relating to the journey of getting the G1D diagnosis, as well as past and current medical care and treatments. You can enter as much or as little information in as many sessions that your time allows.

WHY?

Why should I join the G1D Registry?

The G1D Registry was created to help researchers better understand Glut1 Deficiency, diagnose and treat it more effectively, and identify patient and family's needs.

YOUR participation will make a difference!

It is believed that the current reported number of cases is much less than the actual number of individuals affected with G1D. The registry will help with getting a more accurate measurement of prevalence, as well as reach those that are undiagnosed.

WHO?

Who can enroll?

Any child's parent or caregiver, or any individual (age 18 or older) with a diagnosis of (or suspicion of) Glut1 Deficiency Syndrome who lives anywhere in the world can enroll. Even if you or your child have not had genetic testing or the testing was negative (or normal), you can still participate.

Privacy: Any information you provide will be kept securely in an electronic database. This information will not be placed in your medical record, nor will your insurance company have access to this information. Your information is private, protected and free from any commercial interest.

WHEN?

When should I enroll?

It's never too soon in your journey to join! If you haven't yet enrolled, please take a few minutes to do so now by going to www.G1DRegistry.org. Your participation will benefit Glut1 Deficiency research across the globe.

Once enrolled, please remember to enter any updates since initial enrollment.
